The colorweb package*

The 216 Web-safe colors

John E. Beach

Abstract

This package `\definecolors` the 216 colors that are "Web-safe", *i.e.*, that are supported by most browsers. The color names (and hue sorting order) are from http://www.visibone.com/colorlab/big.html.

Contents

1 Usage **1**
1.1 Sorted by hue . . . 2
1.2 Sorted by saturation . . . 3
1.3 Sorted by value . . . 4

2 Index **5**

1 Usage

Usage is simple—simply add `\color{`⟨*ColorName*⟩`}` to your document, perhaps in a group to limit the color change to a portion of the document.

Colors are listed four different ways:

1. sorted by hue,
2. sorted by saturation (*i.e*, all "DarkHard", all "LightHard", *etc.*),
3. sorted by color value, and
4. sorted alphabetically, in the index.

and paragraphing and forced line-breaks have been inserted so that color names are not hyphenated.

Each list is typeset in `\ShowColorSize` font size so that, at least for the first three, the entire list appears on one page.

This package interacts correctly with the hypdoc and colordoc packages.

*This document corresponds to `colorweb.dtx` v1.3, dated 2013/08/20.
