## Contents of LaTeX's Tools Bundle

**afterpage:** Place text after the current page.

**array:** Extended versions of the environments array, tabular and tabular\*.

bm: Access bold math symbols.

calc: Infix arithmetic expressions. Contributed to the distribution by Kresten

Krab Thorup and Frank Jensen.

**dcolumn:** Alignment on *decimal points* in tabular entries. Requires array.

**delarray:** Adds *large delimiters* around arrays. Requires array.

**enumerate:** Extended version of the enumerate environment.

fileerr: Suite of small files which may be used to control T<sub>E</sub>X's missing file error

loop.

**fontsmpl:** Package and test file for producing *font samples* 

**ftnright:** Place footnotes in the right hand column in two-column mode.

**hhline:** Finer control over horizontal rules in tables. Requires array.

indentfirst: Indent the first paragraph of sections etc.

layout: Produces an overview of the layout of the current document.

longtable: Multipage tables. (Does not require array, but uses the extended features

if both are loaded.)

multicol: Typeset text in columns, with the length of the final columns balanced.

rawfonts: Preload fonts under the old internal font names of LATEX2.09. Not re-

comended for new packages, but may help when updating old files.

**showkeys:** Draft mode showing the *keys* used by \label, \ref, \cite etc.

**somedefs:** Selective handling of package options. (Used in rawfonts.sty.)

tabularx: Defines tabularx environment (similar to tabular\*) but modifies column

widths, not inter-column space, to achieve a desired table width.

**theorem:** Flexible definition of theorem-like environments.

trace: The package helps to suppress and to control the amount of tracing

output (\tracingall) by taming calc and making NFSS less noisy.

**varioref:** Smart handling of page references.

**verbatim:** Flexible version of verbatim environment.

xr: eXternall References. Extend \ref to access \label commands in other

documents.

**xspace:** Smart space command that avoids the common mistake of missing spaces

after command names.
